

# 05-03-2021 Project Update

Group 16

# Last Week

# Last Week

- Made wireframes for many of the application pages
- Made miro designs for back-end implementation
- Began working on actually building the website GUI
- Created a UI-interaction workflow

# This Upcoming week

- We hope to begin and get a real good chunk of the back-end data storage implementation done
- All website pages will be designed and agreed upon
- The GUI pages will split up and tangible progress on 3 different pages will be made
- The UI flowchart will be discussed to make sure that everyone understands and is on the same page for how the user will interact with the application
